

## MULTI-STATE GAMING COMPANY ACHIEVES 655% ROI & SIX-FIGURE SAVINGS

### The Problem

Gaming companies face rising health insurance costs and heightened claims.

Premiums have risen to an average of more than \$5,200 per employee per year.

### Solution: Medicaid Migration

BeneStream recommended to a Nevada based gaming client that it screen 1,000 employees.

We estimated that 158 employees would qualify for Medicaid and 42 or more employees would migrate off the company plan as a result of BeneStream's Medicaid screening and enrollment service.

**BeneStream's Medicaid Migration™ service screened and enrolled a significant portion of their workforce – finding many to be Medicaid-eligible.**

**977**

**43**

Migrated off the Company Plan

### Results / ROI

BeneStream enrolled 49 employees in Medicaid and 43 of them migrated off the company plan. The company will realize over \$200,000 in the coming year in avoided premium payments for those employees who removed themselves from the company plan, and those employees received comprehensive, affordable insurance.

*Employers who implement the monthly screening of new hires and WOTC can realize even greater savings!*
